LLOYD'S REGISTER OF BRITISH AND FOREIGN SHIPPING

SURVEYS ON CONDITION.

NOTICE is hereby given that the Surveyors to the Society will, on application, be authorised to hold Surveys on Yachts or their Machinery, *whether classed in the Yacht Register or not*, for the purpose of reporting on their condition previous to purchase.

The written consent of the actual Owners, or their Agents, should accompany applications for such Surveys.

By order of the Committee,

A. G. DRYHURST,

Secretary.

LLOYD'S REGISTER OF BRITISH AND FOREIGN SHIPPING.

ESTABLISHED 1834.

YACHT REGISTER.

From 1*st May*, 1894, *to* 30*th April*, 1895.

OFFICE: 2, WHITE LION COURT, CORNHILL, LONDON.

THE YACHT REGISTER,—which is printed solely for the use of Subscribers,—contains, in addition to the Names, Class, and other useful information relating to Yachts classed by the Society, the Names, Dimensions, &c., of all Yachts, the particulars of which are known; also, in an Appendix a List of the various Yacht Clubs and Illustrations of their respective Flags, an Illustrated List of Racing Flags of Yachts, an Index of Signal Letters, a List of Yachts which have had Names Changed, a List of Yachts arranged according to tonnage, a List of Builders and Designers with the Names of Yachts built or designed by them so far as they can be ascertained, and an Alphabetical List of the Names and Addresses of Yacht Owners, with the Yacht Clubs to which they belong.

A Key to the Register precedes the List of Yachts.

The Rules and Regulations of the Society and Rules for the Building and Classification of Yachts are bound separately.

1894.

KEY TO SYMBOLS OF CLASSIFICATION IN YACHT REGISTER.

*A1 Character of Yachts built of Iron with thicker plating than the Society's Rules *now* require.

A1 .. Character of Yachts built of Iron according to the Society's Rules in force between the years 1864 and 1871.

A1... Without a numeral prefixed, character assigned to Iron Yachts already built to which the Society's Rules do not apply.

100A1 Character of Yachts built of Iron or Steel in accordance with or equal to the Society's Rules and Tables.

90A1.. Character of Yachts built of Iron or Steel in some respects deficient of the requirements of the 100A class.

A1 ... Character of Wood or Composite built Yachts of the first class, well and sufficiently equipped. The figures prefixed to the character indicate the term of years for which the Vessel is at present classed. Figures placed within parenthesis indicate the expired term of years—originally if on the first line, and on continuation or restoration if on lower lines.

A. .... Without a term of years indicates that the Yacht, though not built under Survey or according to the Society's Rules, is considered worthy of the class assigned.

1 ..... The figure 1 after a character signifies that the Yacht is well and efficiently equipped, as per Table 14.

† ... Prefixed to the class of a Yacht indicates that she is also classed in the Register Book for Merchant Ships, and that the scantlings are equal to the requirements of the same.

The figures under a character denote the date when the Vessel was last Surveyed.

When the characters are omitted from the twelfth column it indicates that the Character has expired or been withdrawn from absence of Survey, or on account of non-payment of fees due in the case.

The figure 1 after the letter A, A or A indicates that the equipment is in accordance with or equal to the Rules.

A line thus — after the letter A, A or A signifies that the equipment is *not* in accordance with the Rules.

A red ring after the letter A, A or A signifies that the machinery or boilers are so far inefficient or defective as to imperil the vessel's safety ; and a black ring over the figure 1 signifies that the masts or rigging of the Yacht are so far defective as to imperil her safety.

The eleventh and twelfth Columns left blank, indicate that the Vessel has never been Classed in the Register Book. Three dots ... in Column 11 *indicate that the Vessel was at one time Classed by this Society, but that the Class has been withdrawn at owner's request. A black line with date under it in Column* 12 *indicates that, at that date, the Vessel,* from reported defects, *was not entitled to a Character in the Register Book. A red line with date under it in this Column indicates that the Class was withdrawn from non-compliance, at that date, with the Society's Rules.*

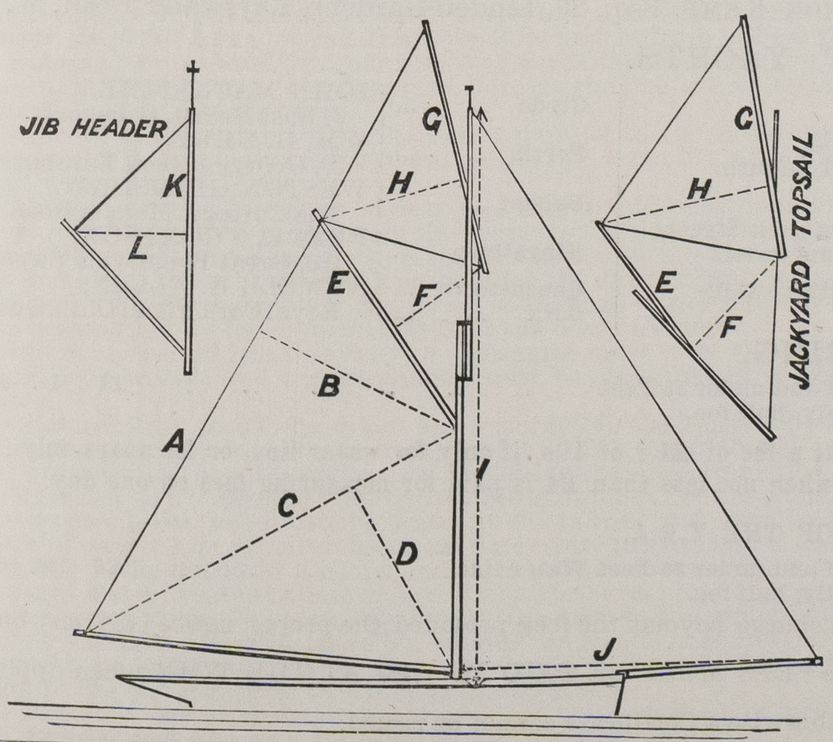
YACHT RACING ASSOCIATION.

RULE FOR ASCERTAINING RATING.

The rating of every Yacht entered to sail in a Race shall be ascertained by multiplying the sail area in square feet by the length in feet on the load water-line, and dividing the product by 6,000 (thus, $\frac{L \times S A}{6{,}000}$ = rating); the quotient shall be the rating, and any fraction of, or exceeding ·01 shall count as 1·, except when the rating does not exceed 10. The length shall be taken in a straight line from the fore-end to the after-end of the load water-line, provided always that if any part of the stem or stern-post, or other part of the vessel below the load water-line, project beyond the length taken as mentioned, such projection or projections shall, for the purposes of the rule, be added to the length taken as stated; and pieces of any form cut out of the stem, stern-post, or fair-line of the ridge of the counter, with the intention of shortening the load water-line, shall not be allowed for in measurement of length, if at or immediately below the load-line, nor above if within 6 inches of the water level.



TO CALCULATE THE AREAS.

Mainsail.

To find the area of the mainsail—Multiply A by B and C by D, as per illustration, and add the two products together and divide by 2.

Yard Topsail.

To find the area of the yard topsail—Multiply E by F and G by H, as per illustration, and add the two products together and divide by 2.

Jib Header.

To find the area of jib header—Multiply K by L, as per illustration, and divide the product by 2.

Head Sails.

To find the area of head sails, jib topsail, or spinnaker—Multiply I (measured from the deck) by J, as per illustration, and divide by 2.

Pole Mast Head Sails.

To find the area of head sail, for pole mast—Multiply I by J, as per illustration, and divide by 2.

SCHOONER'S AND YAWL'S SAILS.

The area of a schooner's sail or a yawl's sail would similarly be found; in the case of a yawl having a lug mizen the lacing-holes in the yard would be taken as the upper boundaries.

FEES FOR MEASURING.

Yachts exceeding 35 Feet on the Water line .. .. £2 12s. 6d.

Yachts of and under 35 Feet .. .. £1 11s. 6d.

For re-measuring hull only or spars only, half fee.

Upon measuring days fixed by a Yacht Club, boats of one rating and under will be measured at a fee of £1 ; or 10s. if only for water line, or for spars only ; the Club in such cases must pay the Measurer's travelling expenses. This scale applies only when not less than £4 is paid for measuring fees on one day.

YACHTS BELONGING TO MEMBERS OF THE Y.R.A.

Yachts exceeding 35 Feet on the Water line .. .. .. £1 11s. 6d.

Yachts of and under 35 Feet Water line .. .. £0 15s. 0d.

For re-measuring hull only or spars only, half fee.

Yachts will be measured on a day preceding a regatta or on regatta days without any extra charge beyond the fees, provided the proper notice is given ; but at other times owners must pay attendant travelling expenses, if any, besides the fees.

N.B.—Application for Measurement must in all cases be made to the SECRETARY ; and the FEES MUST BE PAID TO HIM AT THE TIME when application for measurement is made.

The diagram supplied by the Sailmaker must accompany an application for measurement, otherwise a Certificate cannot be issued.

YACHT RACING ASSOCIATION.

INSTRUCTIONS FOR THE MEASURERS ISSUED BY DIRECTION OF THE COUNCIL.

1. The Measurer shall not measure for the Yacht Racing Association a yacht or boat which he has designed or built, or which any firm he is interested in has designed or built; nor shall he measure any yacht in which he is interested as owner or otherwise.

2. Before measuring a yacht, the Measurer should ascertain from the owner or his representative that she is in her correct racing trim.

All sails, spars, gear, &c., as usually carried by the yacht when racing, must be on board when the measurements for the rating length are being taken.

The Measurer may allow sails, spinnaker gear, tackles, &c., to be put amidships whilst the rating length is tested by the marks and measured.

3. The measurements to be taken are the rating length and the lengths of the spars, or dimensions of sails, in accordance with the Yacht Racing Association rule for the rating of yachts.

4. The rating length shall be obtained by measuring the length over-all on deck, and deducting from this length the distances in to the bow and stern marks as fixed by the owner, from perpendiculars let fall from the bow and taffrail. These perpendiculars are best obtained by a hand lead sunk two or three fathoms deep, so as to ensure a steady line to measure from. The distances in from the line are to be taken by a rod placed parallel to the water surface.

5. The over-all measurement must be taken parallel to the L.W.L. above the deck, starting from any convenient point forward on the rail, knee, &c., ahead of the fore end of the load-water line.

When the length over-all is taken with rods, a line should be stretched taut from the point forward to the taffrail to facilitate the accurate shifting of the rods.

6. After the over-all length has been taken the Measurer must see that the crew are placed at and about the mid over-all length. (See the extract from Rule 14). He must then ascertain that the yacht is not immersed at the load-water line beyond the rating length, as represented by the owner's marks at the bow and stern.

If a yacht is measured in a tide way the Measurer must view the marks in smooth and during slack water; and the overhangs must be measured in smooth and during slack water.

7. All measurements should be taken and recorded in the Measurement Book twice, and a third time if there is material disagreement. The mean should be adopted. A steel tape or rods must in all cases be used for taking the measurements.

8. The Measurer must take and record in the Measurement Book such notes of a yacht's trim, by measuring the height above water at the taffrail and stem, or by such other means, as will enable him at any subsequent date easily to ascertain if the immersion at the water-line or the marks at the bow and stern have been altered since measurement.

9. If a yacht has moveable ballast on board, the Measurer should note its position.

10. In measuring the main boom length from the mast to the pin of out-haul shackle, the Measurer should see that the traveller, whether on a slide or round the boom, is chock out. For this purpose the clew of mainsail should be unshackled and the traveller hauled out to the farthest point to which it can be taken.

11. The Measurer should ascertain for himself the point on the bowsprit or cranse iron to which the base measurement for fore triangle must be taken.

If any description of head-sail is set on a stay, the measurement must be taken to the point where the stay, if continued, would touch the cranse iron; otherwise the measurement must be taken to the farthest point to which the tack cringle of the head sail can be taken.

12. In measuring the height for fore triangle, a piece of white linen should be attached to the ring of the tape, and the tape can be then hoisted by the signal halyards: or by the jib or spinnaker halyards if no head-sail be carried on the topmast stay, or masthead pole stay.

13. Before measuring a jackyard, the sail should be bent to it, or the foot laid parallel to the yard and fairly stretched; and as a check, besides measuring the distance from the sheet to the outer lacing-hole, the number of cloths from sheet to clew should be counted.

14. In the event of any difficulty arising under Section 1 of these Instructions or otherwise, as to the measuring of any particular yacht, the Secretary shall make arrangements for the measuring of the yacht.

EXTRACT FROM RULE 14.

In Yachts of 10-rating and under the total number of persons on board during a match shall not exceed the number set forth in the following table:—

Not exceeding 0·5-rating	2 persons
Exceeding 0·5 and not exceeding 1-rating	3 ,,
Exceeding 1 and not exceeding 2·5 rating	5 ,,
Exceeding 2·5 and not exceeding 5-rating	7 ,,
Exceeding 5 and not exceeding 10-rating	9 ,,

If an owner elects to have his Yacht measured for rating length with a smaller number of persons on board than set forth in the foregoing table, such number shall be stated on the certificate of rating, and shall not be exceeded in any race sailed under the certificate.

March, 1893.

TIME ALLOWANCES.

In calculating these Time Allowances for differences of rating it was assumed that the capability for speed varies as the square root of the length; it was further assumed that the sail area varies as $\sqrt{\text{Length}^2 \times \text{Beam}}$.

From which it follows that the rating by rule 3 varies as $\sqrt{\text{Length}^5}$

and that the capability for speed varies as the fifth root of the rating or $\sqrt[5]{\text{Rating}}$.

Taking the greatest observed speed of a boat 30 feet on the load water line as being 7 knots an hour (and the speed varying as the square root of the length), it follows that a boat 12·7 feet long can sail a knot in 794 seconds. (12·7 feet was chosen because it is the mean length for values of beam of $\frac{1}{3}$, $\frac{1}{4}$, $\frac{1}{5}$ and $\frac{1}{6}$ the length when the rating is 1).

YACHT RACING ASSOCIATION.

It being thought advisable that the time allowances should be, as nearly as possible, identical (for existing Yachts) as those given under the old rating and scale, a proportion of the full speed time has been used in calculating the present scale as will effect that object. This requires that about ·45 of the full speed time should be used in calculating the allowances from the following formula:—

T = Time in seconds it takes a Yacht rated at 1 to sail 1 knot = $794 \times {\cdot}4534 = 360$ seconds.

t = Time in seconds it takes some other Yacht to sail 1 knot.

$$t = T - \sqrt[5]{\frac{T}{\text{rating}}}$$

Say a Yacht is rated at 9: the $\sqrt[5]{}$ of 9 is 1·552; then t, the allowance she makes a Yacht whose rating is 1, will be thus found:—

$$t = 360 - \frac{360}{1{\cdot}552} = 128{\cdot}05 \text{ seconds.}$$

Thus 128·05 seconds is the time per knot a Yacht rated at 9 allows a Yacht rated at 1, as set forth in the column of allowances; and all the other allowances have been similarly found.

As the Scales of Time Allowances have been calculated for one nautical mile or knot, the allowance for any other distance will be found by multiplying the time for one knot by the length of the course. For instance, say a Yacht rated at 59 has to receive time from one rated at 82 on a 45 miles course: the time opposite these two ratings will be taken from the scale and the smaller subtracted from the larger; the remainder will be then multiplied by the length of the course, thus:—

211 · 01
200 · 71
10 · 3
45
51 · 5
412
60)463 · 5·7 mins. 43·5 seconds.
420
43 · 5

When a fraction of a second equals or exceeds ·5 it is treated as one second, but fractions less than 5 are disregarded. In the case illustrated above the allowance, therefore, becomes 7 mins. 44 secs.

To use the scale below 1· the smaller time will be subtracted from the greater. If, however, one boat is, say, of 1·4 rating, and the other of, say, ·65 rating, then the time opposite the two ratings will be added together ; the times are 23·47 seconds and 32·50 seconds respectively, which, if added together, make 55·97 seconds, and that would be the time a 1·4 rater would allow a ·65 rater per knot. Similarly the time between a 1·1 rater and a ·10 rater would be found, and so on.
